Journal of Electromyography and Kinesiology

Volume 5, 1995

List of Contents and Author Index

BUTTERWORTH HEINEMANN

Journal of Electromyography and Kinesiology

M. Solomonow Ph.D.—Editor-in-Chief

T. Moritani Ph.D.—Editor for Japan and the Far East

EDITORIAL BOARD

Gyan Agarwal, Ph.D., Chicago, IL, USA

Kai-nan An, Ph.D., Rochester, MN, USA

Gunnar Andersson, M.D., Ph.D., Chicago, IL, USA

A. B. Arsenault, Ph.D., Quebec, Canada

Richard V. Baratta, Ph.D., New Orleans, LA, USA

Simon Bouisset, M.D., Orsay, France

Naoichi Chino, M.D., Tokyo, Japan

Jan P. Clarys, Ph.D., Brussels, Belgium

Jacques DuChateau, Ph.D., Brussels, Belgium

Roger Enoka, Ph.D., Cleveland, OH, USA

Carlo Frigo, Ph.D., Milano, Italy

Gantcho Gantchev, Ph.D., Sofia, Bulgaria

Francis Goubel, Ph.D., Compiegne, France

Yasunobu Handa, M.D., Dr. M.Sc., Sendai, Japan

Leo Happel, Ph.D., New Orleans, LA, USA

Shunji Hirokawa, Ph.D., Fukuoka, Japan

N. Barrie Jones, Ph.D., Leicester, UK

Paavo Komi, Ph.D., Jyväskylä, Finland

Alojz Kralj, Sc.D., Ljubljana, Slovenia

Carl Kukulka, Ph.D., Rochester, NY, USA

Zvi Ladin, Sc.D., Boston, MA, USA

Yukio Mano, M.D., Ph.D., Nara-Ken, Japan

Marco Marchetti, M.D., Rome, Italy

Bernard Maton, Ph.D., Orsay, France

Roberto Merletti, Ph.D., Torino, Italy

Stephane Metral, M.D., Paris, France

Joseph Mizrahi, Sc.D., Haifa, Israel

David Morgan, Ph.D., Victoria, Australia

Gunnar Nemeth, M.D., Ph.D., Stockholm, Sweden

J. J. O'Connor, Ph.D., Oxford, UK

Sandra Olney, Ph.D., Ontario, Canada

Claudio Orizio, M.D., Brescia, Italy

Philip Parker, Ph.D., Fredericton, Canada

Gunter Rau, Ph.D., Aachen, Germany

Jules Rothstein, Ph.D., Chicago, IL, USA

David I. Rowley, M.B., F.R.C.S., Dundee, UK

Serge Roy, Sc.D., Boston, MA, USA

Arthur Sherwood, Ph.D., Houston, TX, USA

Ed Shwedyk, Ph.D., Manitoba, Canada

Harry Skinner, M.D., Ph.D., Orange, CA, USA

Dick Stegeman, Ph.D., Nijmegen, The Netherlands

Richard B. Stein, Ph.D., Alberta, Canada

Robert N. Stiles, Ph.D., Memphis, TN, USA

Jukka Vitasalo, Ph.D., Jyväskylä, Finland

Kerry Hall, B.A.—Managing Editor

LIST OF CONTENTS

NUMBER 1

The Shape of the Membrane Potential Trajectory in Tonically-Active Human Motoneurons
K S Türker 3

The Function of Neuromuscular System in Maximal Stretch-shortening Cycle Exercises: Comparison Between Power- and Endurance-trained Athletes
H Kyröläinen and P V Komi 15

Intramuscular and Surface EMG Power Spectrum of Dynamic and Static Contractions
H Christensen, K Søgaard, B R Jensen, L Finsen and G Sjøgaard 27

Surface vs. Fine-wire Electrode Ensemble-averaged Signals During Gait
W C Jacobson, R H Gabel and R A Brand 37

The Effects of a Temporal Warning Signal on the Biomechanical Preparations for Sudden Loading
S A Lavender and W S Marras 45

Differences and Similarities in Electrical Muscle Activity for the Abductor Pollicis Longus Muscle Divisions
E van Oudenaarde, J W H Elvers, C C A M Gielen, J M G Kauer, R A B Oostendorp and J H M van der Straaten 57

NUMBER 2

Repeatability of Electrically-evoked Myoelectric Signals in the Human Tibialis Anterior Muscle
R Merletti, L R Lo Conte and D Sathyan 67

EMG Changes in Agonist Muscles During Practice of a Multijoint Throwing Skill
G D Heise 81

Control of Ia Afferent Input to Triceps Surae (Soleus) Locomotor Nucleus Precedes Agonist Muscle Activation During Gait
A A Leis, G J Grubwieser, J H Schild, M S West and D S Stokić 95

Computerized Tomographical Study of Dorsal Neck Muscles for Insertion of EMG Wire Electrodes
M A Mayoux-Benhamou, M Revel, M Wybier and J P Barbet 101

Relationship Between Torque and EMG Activity of a Knee Extensor Muscle During Isokinetic Concentric and Eccentric Actions
G M U Ghori, B Donne and R G Luckwill 109

Electromyogram Analysis and Electrical Stimulation Control of Paralysed Wrist and Hand
N Matsushita, Y Handa, M Ichie and N Hoshimiya 117

NUMBER 3

Induction and Assessment of Experimental Muscle Pain
P Svensson and L Arendt-Nielsen 131

Mechanisms of Muscle Fatigue: Central Factors and Task Dependency
R M Enoka 141

Central Conduction Studies in Patients with Spinal Cord Injury and Other Forms of Myelopathy
K C Hayes and D L Wolfe 151

Innervation Zones in the Back Muscles Investigated by Multichannel Surface EMG
M Shiraishi, T Masuda, T Sadoyama and M Okada 161

Serial Kinematic Analysis of Canine Hind Limb Joints after Unilateral L4–S1 Dorsal Root Ganglionectomy: Insights into Locomotor Control Mechanisms
J A Vilensky, B L O'Connor, K D Brandt, E A Dunn and P I Rogers 169

Cocontraction in the Elbow and Shoulder Muscles During Rapid Cyclic Movements in an Aquatic Environment
A H Rouard and J P Clarys 177

Antagonist Cocontraction of Knee Extensors During Constant Velocity Muscle Shortening and Lengthening
C J Snow, J Cooper, A O Quanbury and J E Anderson 185

NUMBER 4

Normalization of Upper Trapezius EMG Amplitude in Ergonomic Studies
J Winkel, S E Mathiassen and G M Hägg 195

Normalization of Surface EMG Amplitude from the Upper Trapezius Muscle in Ergonomic Studies – A Review
S E Mathiassen, J Winkel and G M Hägg 197

Functional Subdivision of the Upper Trapezius Muscle during Maximal Isometric Contractions
C Jensen and R H Westgaard 227

Muscle Fatigue and Calibration of EMG Measurements
T Öberg 239

Normalizing Upper Trapezius EMG Amplitude: Comparison of Ramp and Constant Force Procedures
M Attebrant, S E Mathiassen and J Winkel 245

Normalizing Upper Trapezius EMG Amplitude: Comparison of Different Procedures
S Bao, S E Mathiassen and J Winkel 251

AUTHOR INDEX

Anderson, J. E. 185
Arendt-Nielsen, L. 131
Attebrant, M. 245

Bao, S. 251
Barbet, J. P. 101
Brand, R. A. 37
Brandt, K. D. 169

Christensen, H. 27
Clarys, J. P. 177
Cooper, J. 185

Donne, B. 109
Dunn, E. A. 169

Elvers, J. W. H. 57
Enoka, R. M. 141

Finsen, L. 27

Gabel, R. H. 37
Ghori, G. M. U. 109
Gielen, C. C. A. M. 57
Grubwieser, G. J. 95

Hägg, G. M. 195, 197
Handa, Y. 117
Hayes, K. C. 151
Heise, G. D. 81
Hoshimiya, N. 117

Ichie, M. 117

Jacobson, W. C. 37
Jensen, C. 227
Jensen, B. R. 27

Kauer, J. M. G. 57
Komi, P. V. 15
Kyröläinen, H. 15

Lavender, S. A. 45
Leis, A. A. 95
Lo Conte, L. R. 67
Luckwill, R. G. 109

Marras, W. S. 45
Masuda, T. 161
Mathiassen, S. E. 195, 197, 245, 251

Vilensky, J. A. 169

West, M. S. 95
Westgaard, R. H. 227
Winkel, J. 195, 197, 245, 251
Wolfe, D. L. 151
Wybier, M. 101

You Benefit With Disk Submission

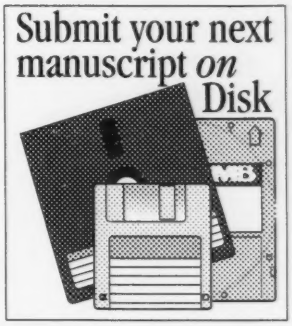
Elsevier Science encourages the submission of articles on disk. We want Authors to provide us with their final manuscripts directly from their computer or word processing systems, without the need to follow complicated instructions. If you submit electronic manuscripts, you will notice the benefits:

- **A speedier publication process**
- **A clearer set of proofs, with fewer errors**

  Providing electronic manuscripts will improve the delivery of proofs - delivery will be faster and more reliable. Also, without needing to rekey the text the possibility of introducing errors will be avoided
- **Inclusion in an electronic archive**

  Elsevier Science is committed to developing and maintaining electronic archives for all of its journals. This will provide the flexibility to take advantage of electronic media to disseminate the information published in our journals, including your article.

There are some basic points to be kept in mind and we do have certain preferences. However, with Elsevier's expertise and facilities it does not really matter on which computer or wordprocessing system your manuscript has been prepared.



Basic Points to Help Us

Delivery of Electronic Files
Disks must be clearly marked with the following information:

- **Operating system**
- **Disk format (e.g.DS/DD)**
- **Word Processor used, including version number (users of see later)**
- **Authors' names**
- **Short title of article**

Three printed copies of the final version of the manuscript should be submitted with the disk to the Journal Editor.
In the event of differences between disk and hardcopy, the hardcopy will be considered as the definitive version.

Preparing Electronic Text Files

Please follow the general instructions on style and arrangement and, inparticular, the reference style as given in Notes for Authors for the book or journal concerned. If you are contributing to a multi-author work, please consult the publisher or earlier volume for style conventions with respect to headings, reference citation, etc.

LaTeX/TeX

Authors wishing to submit their article as a LaTeX/TeX file should note the following:
Authors should ideally use the "Article" style or the Elsevier LaTeX package which is available via anonymous FTP from CTAN centres.
(Further details on TeX can be obtained from Martin Key or Sebastian Rahtz)

Host names:	**CTAN directory:**
ftp.dante.de	/tex-archive/macros/latex/contrib/supported/elsevier
ftp.tex.ac.uk	/tex-archive/macros/latex/contrib/supported/elsevier
ftp.shsu.edu	/tex-archive/macros/latex/contrib/supported/elsevier

Authors should not add their own macros

Preparing Electronic Graphic Files

Illustrations should be produced in the Macintosh environment if possible using the following software packages:
Adobe Illustrator, Aldus Freehand, Cricket Graph, Macdraw, Chemdraw, Corel Draw for PC
However we will accept any of the popular drawing programs for the Macintosh and PC.
Artwork should be drawn for finished size using a Times or Helvetica typeface at a final size of 8pt type with appropriate lineweights.
Please indicate format, operating system, program and version number of the software used. If possible also print a directory of filenames.
Scanned artwork should be saved to Tiff format for both line and halftone and scanned at a suggested setting of 400 dpi for half-tones and 1000 dpi for linework. If it is necessary to compress the scans please indicate the software used. It is essential that a hard copy print of the scans be included. Illustrations should be logically named and saved as individual files to 3.5" disk or a SyQuest cartridge 44Mbyte or 88Mbyte. If 3.5" disks are not available to you, 5.25" disks are acceptable. Please send a laser print of the artwork with the electronic file.
When submitting electronic colour images please indicate the file format and program used (including compression software). Include a 4 colour machine or cromalin proof and check that all the separations (if provided) are colour identified.
